

Explain My Bill

Phase 1 — Initial Launch Plan | Consumer app for India

The Problem

Electricity, credit card, EMI, restaurant and hotel bills in India are full of charges consumers don't understand — slab jumps, surcharges, “no cost” EMI that isn't free, and GST add-ons. No app in the Indian market currently explains a bill in plain language — existing apps only let you view or pay it.

What We're Building (Phase 1)

Bill type	What it explains
Electricity (EB)	Slab-wise tariff breakdown, fixed vs. energy charges, surcharge decode — Tamil Nadu, Kerala & Telangana
Restaurant bill	GST (5% standalone, 18% in specified-premises hotels) vs. service charge vs. tip, overcharge flags
Supermarket / grocery	Branded vs. unbranded GST slabs (0/5/18%), item-wise breakdown, discount/MRP checks
Hotel stay bill	GST by room-tariff slab (0% / 5% / 18%), city/resort taxes, add-on charges explained line by line
Credit card bill	Interest calculation, minimum-due trap, late fees, EMI conversion & true APR, hidden charges flagged
Gas bill	LPG domestic vs. commercial GST (5% / 18%), piped natural gas charges explained

How It Works

Upload a photo or PDF of a bill → AI reads and categorises every line item → plain-language summary + “is this normal?” flags → optional: paste the bank/e-commerce EMI offer link to cross-verify advertised terms against the actual charge.

Platforms & Realistic Timeline (Week 1)

Web app	Live and usable — no external gatekeeper, full control of release
iOS app	Built, tested, submitted to App Store — approval typically adds 1–3+ days beyond our control
Android app	Built and submitted to Play Store — review usually faster, still outside our control
Early access	TestFlight (iOS) + Play Internal Testing (Android) so real users can try it same-day

Why This Wins

- No direct competitor in India doing bill *explanation* (vs. viewing/paying)
- Aligned with RBI's own concerns about No Cost EMI mis-selling — good timing, not against the grain
- Built for Claude's core strength: reading + reasoning, not heavy real-time bank integration

Note: informational/educational tool only — not financial advice. Legal review of positioning recommended before public launch.
